MTA Report/Documentary

What we're looking for:

- Children preparing their bags
- Children looking at the flyers of the trip
- Admin work: phone calls, meetings, footage of any other preparations or resource gathering.
- If possible: footage of the children in their local environments (Mosque, houses, walking around in the neighborhood, playing at gym or park, meeting each other etc.)

This can be filmed on a phone in 1080p/4K in landscape. We will try to get some preparation footage from Maryland with our equipment as well. But it would add valuable information to get some BTS from other areas.
